London Publishers Rejoice Over Fall of Lloyd George; Look for Saner Government

Paris Newspaper Comment
Claims Collapse Victory
for France.

BONAR LAW NOW AT HELM

Rapid progress in formation of new cabinet is indicated by personnel which is withheld from public until Chamberlain's successor named.

By Associated Press
LONDON, Oct. 20.—The majority of London's morning newspapers claim, with considerable justification, that the fall of Lloyd George's ministry is a victory for France. The new government, which is expected to be formed within a few days, is expected to be a more moderate and sane government than the one which has been in power for the last few years.

PARIS, Oct. 20.—The dominating note in the French press comment on the fall of the Lloyd George cabinet in England is that the change cannot fail to make negotiations for the settlement of European problems easier. By the majority of the papers it is looked upon as a victory for France.

LONDON, Oct. 20.—Andrew Bonar Law appeared today in the House of Commons to replace the fallen cabinet for government. This was evidenced by the fact that the House of Commons was called to order at 11 o'clock, and the House of Commons was called to order at 11 o'clock, and the House of Commons was called to order at 11 o'clock.

LONDON, Oct. 20.—After holding the office of prime minister for seven years, the most critical years in British history, the years of war and reconstruction, David Lloyd George, yesterday, was described in the House of Commons as a man of great ability and great courage.

Such a speech of his position in his own mind, he said, he felt that he was a man of great ability and great courage. He felt that he was a man of great ability and great courage. He felt that he was a man of great ability and great courage.

And Mr. Bonar Law will put the prime minister's mantle for a short time. The king, anointed him to the office of prime minister, and he will be the first to wear it.

Lloyd George advised the king to appoint Mr. Bonar Law as prime minister. The king, anointed him to the office of prime minister, and he will be the first to wear it.

NEWS OF DAY AT SCOTSDALE BRIEFLY TOLD

William E. Van Norden, Jr.,
New Physical Director at
Y. M. C. A.

IS HIGHLY RECOMMENDED

Special to The Courier.

SCOTSDALE, Oct. 20.—Announcement is made by the Young Men's Christian Association that the association has secured William E. Van Norden, Jr., as physical director. Mr. Van Norden comes from Plainfield, N. J., where he served as assistant physical director for two years. He left there to enter the Army. After his discharge from the Army, he took the position of director of athletics and assistant employe manager with the Spicer Manufacturing Corporation at Plainfield, N. J. After two years with the Spicer Corporation he became physical director of the Y. M. C. A. at Tarentum. A special effort was made by the membership to retain Mr. Van Norden, by means of a petition of over 400 names.

Mr. Van Norden has specialized in gymnastics, health education, basketball, baseball, football and track and he is considered an expert performer at light and heavy work.

For Sale

Five-room house with heater, mountain water in house, garage for two cars, room for four horses in basement of garage, one acre lot. House now empty. On terms for \$2,200. E. F. DeWitt, Scottdale, Pa.—Advertisement-18-4.

Baby Clinic News.

Miss Margaret Flynn of Greensburg, assisted by Miss Knight and Mrs. Cecile Loucks, conducted a baby clinic at the Y. M. C. A. yesterday afternoon. Among the babies at the clinic was one from Canada, reared according to clinic methods in Canada and even cared for as a very small child by the visiting nurse. The child was fairly radiating health.

Sociality Entertainers.

The regular monthly entertainment of the Young Ladies' Sociality was held in St. John's Hall last evening. The pastimes of the evening were 600 and bridge. Refreshments were served. The committee in charge was made up of Miss Margaret Hickey, Miss Kathleen O'Connor, Miss Betty Kenney, Miss Kathryn Doorley, Miss Grace Maloy, Miss Margaret Quinn, Miss Mary Melde, Miss Mercedes Coyle, Miss Mildred Hickey and Miss Marie Gossel.

Covered-Dish Supper.

The Ladies' Bible Class of the Lutheran Church held a covered-dish supper at the church last evening.

New Business Firm.

J. G. Darling and J. Ream Kestler have leased the Pittsburg street room formerly occupied by the Scottdale Electric Shop and will open a wholesale and retail fruit market.

For Bride-Ellect.

Miss Elsie Collins gave a miscellaneous shower at her home in West Pittsburg street last evening in honor of Miss Elsie Blackburn, whose marriage to Wilbert Kuhns of Ligonier will be an event of this month. Many beautiful presents were received. Lunch was served.

For Sale.

Six-room house, one acre land, water in house, garage, on macadam road, 15 minutes' walk from railway siding or street car. Enough of the nine-foot vein of coal available under lot to pay for place twice. Can give possession in 15 days, for \$2,500. E. F. DeWitt, Bell phone 299-J, Scottdale, Pa.—Advertisement-18-4.

Personal Notes.

Mrs. S. C. Lydie has returned to her home at Gypsy after a visit with her son, B. W. Lydie.

Rev. Paul S. Wright is attending the Bible School Institute and New Testament Congress in St. Louis this week. He will be home to preach on Sunday and will use as the theme for his morning sermon, "The Use of Misfortune" and for the evening, "The Christian-Filled Life."

Mrs. Hattie McDonald has moved to Pittsburg.

Don Baker of Spring street was called to St. Louis last evening on account of the illness of his brother.

Mr. and Mrs. E. E. King of Pennsylvania are spending the week at Erie.

Mr. and Mrs. C. A. Bodenheimer have returned from Springdale.

Chiopyle

CHIOPYLE, Oct. 20.—Mrs. J. B. Hages returned Wednesday from a visit with her son at Indian Head.

If You Suffer from Constipation Read this Message Immediately!

About 90% of all cases of constipation can be traced to the use of laxatives. The great natural cleanser is Bran. It is a desirable way of correcting constipation through food. Bran is nature's food—not a "remedy"! Do not think of Kellogg's Bran as you think of pills and cathartics which never can afford permanent relief. Pills and cathartics aggravate already dangerous conditions. Kellogg's Bran sweeps the bowels naturally, cleansing and purifying the intestinal tract without irritation or discomfort. It also, too, that the regular use of Kellogg's Bran will clear up a pimply complexion and it will free the breath from disagreeable stomach odors. At least two tablespoons should be eaten daily, and as much more as needed for relief of chronic cases. Kellogg's Bran, cooked and krumpled, is delicious served as a cereal, or it can be sprinkled over your favorite cereal. Its nut-like flavor adding a delightful zest to breakfast! Kellogg's Bran is delicious in raisin bread, muffins, pancakes, gravies, etc. Start the family eating Kellogg's Bran tomorrow morning! Kellogg's Bran will actually build up the kiddie into the robust health! Your grocer has it.

Republican Candidates For Legislature Men of Unquestionable Integrity

Fayette county Republicans will send one of the strongest delegations to the State Legislature this fall that has ever represented the county in the lower house at Harrisburg. The Republican candidates are men of ability, vision and integrity, who will give the best to those matters which will come up for consideration in the Legislature. Three of the four candidates have served the Nation in time of war with the men at the front. The fourth, during the World War, gave practically all of his time in work at home.

The nominee in the First district is William J. Buchanan, who has served in France. He is past commander of Post 278, The American Legion, is scoutmaster of the Smithfield Boy Scouts, secretary and treasurer of the Wild Life League, a successful merchant and an active church worker.

In the Second district, the nominees are: Thomas J. McDaniel, of Uniontown, soldier, minor teacher and lawyer. Joseph K. Bush of Brownsville, soldier and business man. Joseph B. Henderson of Connelville, prominent in business and church affairs of the immediate Connelville territory.

Mr. McDaniel is, in every sense of the term, a self-made man. His education himself through hard work, working as a miner to obtain the money necessary to fit himself, first as a teacher in the Georges township schools and later to achieve a degree from the Ohio Northern University Law School, after which he took up his chosen profession as a member of the law firm of Brownfield & McDaniel. Less than a month after the United States had entered the World War, he was in service and rose rapidly through his ability as a leader, until he achieved the rank of captain which he held until he was mustered out of service.

Mr. Bush, born on a farm in Washington county, spent several years as a teacher, and on April 16, 1906, came to Brownsville, where he engaged in the insurance business and is still in that business. He served in the war with Spain under command of Colonel T. S. Crago. From 1902 to 1905 he served with the Louisiana Purchase Exposition Company, following which he came to Brownsville. Mr. Bush has served with the South Brownsville Board of Education, is a director in the South Brownsville Improvement Co. and a member of the Brownsville Chamber of Commerce. He is a member of the Insurance Federation of Fayette County and a member of the School Directors Association of Fayette County.

Mr. Henderson was born in Armstrong county in 1859, came to Fayette county in 1887, locating at Vandersburg, where for 35 years he was store manager and superintendent of a mine there. He is an efficient business man and will give an efficient business consideration and judgment to all matters brought to his attention in the Legislature. He served for a period of 30 consecutive years as superintendent of a Sunday school at Vandersburg and since moving to Connelville has been a leader in the Sunday school work there.

NATIONS OF EUROPE NEED SYMPATHETIC COUNCIL AND HELP

Of United States, Says Church
Leaders After Visit to
Continent and East.

OPPORTUNITY IS OURS

Special to The Courier
WASHINGTON, Oct. 20.—Last summer the Federal Council of Churches commissioned a friendly mission to the churches of Europe and East, a number of Christian leaders, bearing messages of goodwill and friendship from America, they visited separately, practically all the countries of Europe including the Near East.

Now most of them are home and have joined in issuing a statement of conditions in Europe as they see them from the Christian viewpoint. They declare that the moral and political problems of continental Europe are fundamentally economic. They are unanimous in saying that the nations overseas can never meet the situation caused by the war in which the United States took part without the sympathetic counsel, advice and economic help of America.

These friendly visitors include representatives of the clergy, college presidents, educators, business men and women of prominence. Their statement which is presented in the form of seven points is as follows:

First, it is clearly evident that the Protestant Church bodies and institutions of continental Europe are showing courage, patience, forbearance and faith in their effort to meet the prevailing distressing conditions economically, morally and spiritually.

Second, they have not only these conditions to meet, but also the strongly aggressive attitude of religious intolerance supported in some cases by political influence.

Third, they look to the Christian Churches of America constituting the Federal Council for moral sympathy and support and for material help for their sadly depleted resources, with an eagerness which is completely and appropriately expressed in frank and open recognition of the extent of their need.

Fourth, it needs only an ordinary contact with continental Europe to make clear the fact that her political problems are fundamentally economic. The United States, therefore, has an opportunity to help her in the war in which the United States was a participant, without the sympathy of counsel, advice and economic help of the United States arranged in mutual conference.

Fifth, we believe that the chief of our mission in this respect is to point out to the world the responsibility of the United States in the economic situation of the present moment.

Sixth, we believe that the chief of our mission in this respect is to point out to the world the responsibility of the United States in the economic situation of the present moment.

On the whole, our visit to the continent has deepened our faith in humanity and we are convinced that the Federal Council through its appropriate committees do its utmost to develop in our people and in their political leaders the sense of moral responsibility which today in the Providence of God has fallen to us as a people.

WORLD'S OUTPUT OF COAL SHOWED GAIN DESPITE STRIKE

Estimated at 563,000,000 Metric
Tons During First
Half.

U. S. PRODUCES A THIRD

In spite of the great strike in the United States the world's production of coal in the first half of 1922 was greater than in the corresponding period of 1921. The total output in the six months from January to June 1922, according to reports collected by the United States Geological Survey, was approximately 563,000,000 metric tons.

Continued for 12 months this rate of output would yield a total of 1,137,000,000 tons. Settlement of the strike

Furniture That Stays "Good"

You want good furniture for your home, of course. Whether it be for the living room, dining room, bedroom, hall, kitchen or sun-room, you want something that, practically speaking, will do for all time. All the furniture you see here is good to look at; not only when you see it in the store, but when you put it into your home. And it's going to stay that way; it will not only stand up under service but even the character and appearance are the kind that wear well; you won't tire of it; you will be glad to have it a permanent part of your home.

Our convenient credit plan enables everyone to buy good furniture. Practical shoppers have found it a very business-like and dignified arrangement.

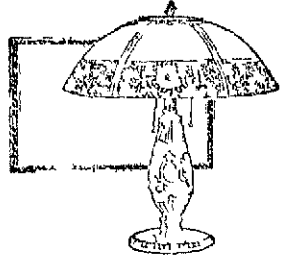

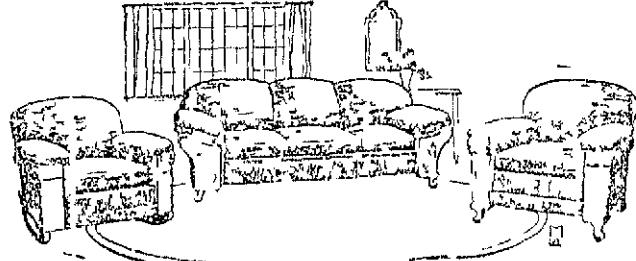

Table Lamp
Special at \$14.95

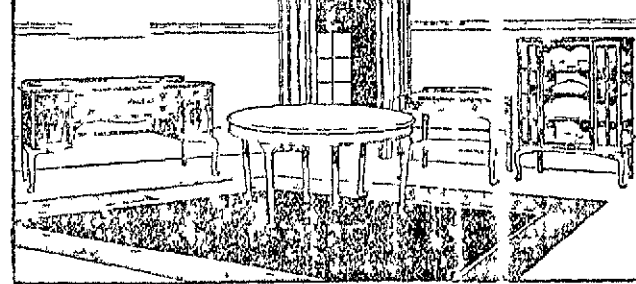

These Lamps are the very latest shapes and styles of metal glass shades. All floor lamps reduced 20%.

A Week-End Shopping Guide—What Do You Need?

Women's and Misses' Wear

FALL TOP-COATS, \$10-\$15—these are trim garments designed along the lines of much more expensive models especially for misses and women who want to limit their clothing expenditures. All our patrons agree that they are very unusual values for the money. You will favor them for roughabout wear these crisp October days.

TRICOTINE AND JERSEY DRESSES, \$9.95—they are new models in practical materials appealing especially to school teachers, business women and women whose main interest is economy.

NEW MISSES' MODES, \$5.95-\$6.50. New frock ideas from Peggy Paige in which Serpentine, Duveltyne and Canton are the leading materials. One trims itself in monkey fur.

NEW THREE PIECE COSTUMES, \$5 to \$13.50. The very latest modes, combining the virtues of both frock and suit. Caracul, wolf and beaver are the fur trimmings. Beautiful materials.

WOLF TRIMMED COATS, \$7.50 to \$12.50—feature bloused backs and wide sleeves and are the outstanding coat favorites of the season. In a good variety of material and style.

Apparel Sections—2nd Floor

Millinery

HATS IN VELVET AND FELT COMBINED WITH METAL CLOTH, \$7.50—they come in black and the better Autumn and early Winter colors and are trimmed with coques, burnt goose, ribbons and flowers. Aluminum, the new Parisian metal tint, appears in the group. These are new models specially priced at \$7.50.

Second Floor

Purses Special!

WOMEN'S HANDBAGS, SPECIAL \$2.95. Handbags reflecting Fall style tendencies in their mirrors and smart fittings are specially priced Friday and Saturday. Many different leathers.

CONNELLSVILLE, PA., FRIDAY EVENING, OCTOBER 20, 1922.

SIXTEEN PAGES

Back to Pre-Strike Normal Or Much Better is Assured Within Less Than a Week

Gains of Last Six Days 14,360 Tons, Bringing Total Close to Year's Record.

13 PLANTS, 1,253 OVENS

Placed in Commission With Still More Being Fitted Up; Certain Prospect for Near Approach to 1920's Monthly Average Production of 202,000.

Special to The Weekly Courier.

Within less than a week the effects of the sympathetic strike in the coke region, insofar as relates to enforced idleness of plants and ovens and the curtailment of production, will have been obliterated and a wholly new record for the year will have been made. This achievement will be possible because of the rapid gains being made in firing up idle plants and ovens and, bringing recently lighted ovens up to full production.

So noticeable an improvement in these particulars was made last week that the output lacked but 5,000 tons of equalling the highwater mark of the year, which was attained during the week ended April 1. With the increase of the week reaching 14,360 tons, which swelled the total to 440,710 tons, the present week need only slightly better than half as well as last in order to wipe out the red ink entries in the production column during the strike period.

If all conditions of operation and transportation had been normal, permitting 100 per cent efficiency, last week would have developed more than caught up with the pre-strike production. But conditions were not normal, are not yet normal and will not be normal for some time to come. Car supply and service are still fairly good during the first two or three days of the week but toward the end the supply will suffer a decrease. With several days are required to develop the degree of heat necessary to produce good coke or to permit the proper amount of coal being charged. Plant organizations have not acquired the old-time proficiency and cooperation, hence there is lots of lost motion when the plant machinery begins to take the up-grade of reconditioning.

All of these things contribute, and in a very material way, to preventing as much coke being made as the facilities in use have the capacity to produce. That last week's output was approximately 80 per cent of capacity of the ovens in blast shows, however, that rather extraordinary progress has been made under very unfavorable circumstances. It is an encouraging promise of what will be possible to be accomplished when the region strikes its old gait and has been freed of the obstacles by which it is confronted.

That there will be a very decided augmentation in production during the current week and afterward is more than a possibility. It is a certainty, so far as present facts and indications can be depended upon. The region's complement of active plants having been increased by 13 and its ovens increased by 1,253 last week, and still more of both being prepared for action this week, the production of coke will sooner or later assume proportions approaching 1920's monthly average of 202,000.

From the merchant furnacemen's point of view the significant and encouraging feature of present developments in the coke region is the advances the merchant coke producers are making in the matter of restoring their plants to operation. Last week W. J. Rainey, Inc., started up four of its six coke-making plants, closing the week with 28 per cent of the ovens in the running. This week the Washington Coal & Coke Company, another large merchant producer, is making preparations to function as a coke maker. Altogether there were 11 merchant plants and 738 ovens placed in commission last week as contrasted with 116 ovens which included two newly fired independent furnace coking plants. Somewhat less than 3,000 tons of coke were stocked, almost all of which was at plants of the leading furnace interest.

Transportation service last week was much the best of any week since the railroad strike. The Pennsylvania railroad had a movement of 9,066 cars of coal and coke combined, a gain of 1,084 cars as compared with the week preceding.

The estimated production of coke during the week ending Saturday, October 14, was 140,710 tons, divided between the two districts as follows: Connelville, 98,850, an increase of

8,860 tons; Lower Connelville, 41,860, an increase of 5,510 tons, or a total increase of 14,360 tons, as compared with an increase of 7,670 tons during the week preceding.

By interests the production was: Furnace, 98,700, a gain of 7,000 tons; merchant, 42,010, a gain of 5,760 tons, as compared with gains of 850 and 6,820 tons respectively during the week ended October 7.

A total of 13 additional plants and 1,253 ovens were brought into production during the week. All of the newly fired plants except one were merchant operations. Of the ovens 515 were at furnace and 738 at merchant operations. Of the former 389 were at plants of the E. C. Frick Coke Company.

The re-lighted plants were: Allison, 62; Elm Grove, 31; Mount Bradock, 180; and Revere, 80 ovens, of W. J. Rainey, Inc. Other ovens at merchant plants were: Gilmore, 40; American No. 1, 44; Eleanor, 30; Herbert, 10; Husted, 20; Liberty, 24; Mount Hope, 40; Puritan 1 and 2, three; Richhill, 32; Sackett, 16; Shamrock, 20; Thompson No. 2, 22; Tower Hill No. 1, 31; Tower Hill No. 2, two; Yukon, 36; Geneva, 24; Orient, 40; Republic, two; Dunbar, of American Manganese Manufacturing Company, fired up 60 ovens.

The additions at Frick plants were: Bluff, 13; Continental No. 1 and No. 2, 20 each; Davidson, 53; Juntura, 12; Lefebvre No. 1, 60; Lemoine No. 2, 20; Matamoras, 10; Phillips, 25; South-west No. 1, 15; Standard, 73; Trotter, 40; Colonial No. 1, 20.

The week-to-week record for production, and the decrease or increase over that of the preceding six days since April, is shown in the following:

Week Ending	Production	Decrease	Gain
April 1	140,000
April 8	134,400	5,600
April 15	138,910	3,510
April 22	140,850	1,940
April 29	142,300	1,450
May 6	142,200	1,900
May 13	141,100	1,100
May 20	140,710	3,260
May 27	140,710	1,700

Lake Shipments Decrease Slightly

Although shipments of soft coal into vessels at Lake Erie ports continued at a high rate, there was a slight decrease in the tonnage handled during the week ended October 8 as compared with the preceding week. The total handled during the week ended October 8 was 1,179,298 net tons, as against 1,245,373 tons in the week before.

During the present season to October 8, inclusive, 10,936,033 tons of cargo coal have been shipped into vessels at Lake Erie ports. Of this quantity, 9,829,091 tons were forwarded to regular Lake markets and 1,006,942 tons were forwarded to Lake Erie destinations not ordinarily taking Lake coal.

Sharp Break Develops In Prices of Both Furnace And Foundry Grade Coke

Former Now Being Offered
Freely At \$9.00; Latter
At \$11.00.

ABOVE \$10 WAS TOO HIGH

Furnacemen Claim, for Absorbing
More Than Enough Ponnage to Get
Their Stocks in Blast; Buyers Holding
Off to Observe Extent of Decline

Special to The Weekly Courier.

PITTSBURGH, Oct. 18.—The week-end that was apparent in coke prices a week ago developed into a sharp break, and prices have been dealing sharply daily in the past few days, until now coke is offered very freely at \$9.00 for furnace and \$11.00 for foundry without finding any takers.

The remarkable thing is not that prices have been declining, but that they stayed up so long, and particularly that the market was so steady for when prices are outside a natural level violent fluctuations are ordinarily to be expected.

The iron trade was able to absorb only a very limited tonnage of coke at prices above \$10, for the reason that it could not get much pig iron at prices dictated by such a coke price. Ever since pig iron went above \$21 or

STEEL MILLS RUNNING AT 70 TO 75 PER CENT; HIGHEST RATE OF YEAR

Buying in Moderate Proportions Fur-
nishes Considerable Support
to the Market.

Special to The Weekly Courier.

NEW YORK, Oct. 18.—The American Steel Market and Daily Iron & Steel Report will review the steel and iron trade tomorrow as follows:

Steel mill operations are averaging between 70 and 75 per cent of capacity, representing the highest rate of the year. Shipments continue to be greatly interfered with by transportation conditions, including both car shortages and embargoes. Accumulations of stock at mills are not increasing greatly, but at few if any plants has there been any material reduction in the past week.

Buying of finished steel products by consumers who are not receiving full deliveries on old orders furnishes considerable support to the steel market. The volume of new requirements arising is of distinctly moderate proportions. There is practically no interest in far forward deliveries of steel, except in connection with railroad equipment orders, which continue to make a very fair showing.

Finished steel prices are substantially the same as they have been for two or three weeks past. There is a tendency for the largest, delivery premiums to disappear but in the majority of products there are still some premiums for early deliveries.

The Connellsville coke market has been declining for a week or more past, the declines being rather sharp, in keeping with the sensitiveness this market always exhibits. There is increased production of merchant coke, and at the same time an indication to buy until a stable market is developed.

Quotations on pig iron have been declining in various districts, partly on account of demand being very limited and partly on account of driving buyers out of the market, and a substantial reduction will be necessary to stabilize the market. Basic pig iron has been offered at \$9.00, Valley without finding takers.

Conditions in the iron and steel market remain in several respects those that obtained two years ago. As to prices, the readjustment of raw and intermediate products rather than finished steel. No material change in finished steel is expected for some time to come.

Oil and Gas Fields Of the United States

A large map of the oil and gas fields of the United States has just been published by the United States Geological Survey, Department of the Interior. This map, which is on a scale of 40 miles to the inch, shows the oil fields in green, the gas fields in red, and the oil and gas basins in blue. The map is a valuable reference for anyone interested in the oil and gas industry.

The map is not a revision of the last edition of the Geological Survey's oil and gas map of the United States, which was published in 1917, but is a new compilation. In its preparation the best information available to the survey was utilized, and the map was revised by incorporating the latest information received from oil and gas fields, and pipe-line companies operating in all the producing states. The map measures 19 by 76 inches.

Buy Property at Dawson.
George Livingston of Dawson, Liberty, has bought the J. W. Brower property in North Dawson and will move his family into it this week.

there has been a very limited sale for it, and \$30 was crossed simply because only an extremely small quantity was offered. Conditions this year are quite different from those obtaining in the summer of 1920, when coke went to \$15.00 for iron to \$50. There were many consumers then that were both able and willing to pay more than \$40 for pig iron. Money was more plentiful or appeared to be, and pig iron producers, steel, castings, etc., were bringing fancy prices. Of late even \$30 has been a prohibitive price for pig iron in most cases.

Coke at above \$10 was high relative to the availability of pig iron and it was high also relative to the market price of coal, as the coke was bringing much more than the coal involved would bring, plus the cost of conversion into coke. Often in the past coke has brought more than its price relative to coal, but only for limited periods, and sometimes it has not brought as much as its relative price for insurance last January when coke sold for a time at \$2.75.

Until quite recently the position of the average merchant furnace, out of blast, was that it would get into blast as soon as it could. The exact price of coke was not, apparently, much of an object, the chief desire of furnacemen being to get a regular supply. Picking up odd lots of coke in the open market made very low furnace prices, increasing the coke and iron along consumption per ton of pig iron and at the same time giving no assurance that the operation could be continued at all. Now that so many furnaces have returned the case is quite different and the remaining furnacemen will consider carefully both the cost of coke and the prospects that the pig iron to be made can be sold just at the moment it is made. In some just what pig iron would bring in fair tonnage as there is practically no market.

Besides the decline in actual prices for coke there is a great change in the way coke is being offered in a widespread manner. Only very recently furnacemen were practically urging operators to sell their coke, and were putting in bids for the first coke to be made from plants that might find it feasible to get into operation. The usual result of a decline in price of a commodity is to cause buyers to withdraw from the market, so as to observe how far the decline is to extend, and coke is no exception. While buyers cannot stay out of the market indefinitely they are out at the present time, except for the satisfaction of some pressing want. The market is scarcely more than asking price market at the present time, as follows:

Furnace coke\$ 3.01

Foundry Coke\$11.04

Some operators suggest that they cannot afford to sell at such prices, their costs being higher. They do not receive many expressions of sympathy from furnacemen, as the furnacemen have troubles of their own, in trying to find a price which consumers will pay for pig iron.

Cherry Valley furnace at Letonia, O., was blown in Monday morning, and McKelvey furnace, in the same town, is about to go in. The Cherry Valley coke is made at beehive ovens at Letonia, while the McKelvey furnace will use coke made at beehive ovens in the Connellsville region. In some cases the supply of merchant pig iron is increased while there is no greater absorption of merchant coke. With several other merchant stacks already in operation the pig iron market has become very soft and has started on a process of finding its price level. There are no transactions that would show just where the market stands, since buyers continue to hold off, and present asking prices are considerably below prices at which pig iron sold recently. If these asking prices do not develop sufficient orders they will be reduced, and so on. Present asking prices are not above the following figures:

Pig iron, basic.....\$12.00

Pig iron, foundry.....\$12.00

These prices are f. o. b. Valley furnaces, freight to Pittsburgh being \$1.77. The Columbia Steel Company is also offering merchant pig iron, as freight from Johnstown being likewise \$1.77.

The Pittsburgh coal market has been softening in the past week. Some sales of steam coal have gone through at \$3.00, with others at \$2.25 and a few sales at \$3.50. By-product coke is about \$3.50 and gas coal, nine-run, about \$4.00. There is very little demand for coal in the open market, consumers being apparently well supplied by their regular sources, at prices which are adjusted from time to time to the market as currently developed.

Avoid Imitations and Substitutes

At the Theatres

THE SOISSON.

"THE CROSS ROADS OF NEW YORK," the feature picture today, Friday and Saturday at this theatre, is a First National production presenting an all star cast.

The plot involves the vicissitudes of a young lad from the country who has to face in his invasion of a big city. Michael Flint is the name of the rural missionary whom Mr. Sennott sends to the big town and the role is admirably filled by George O'Hara. The incidents in which he participates, from the Saturday night sojourn at the boarding house to the opening of a Broadway show are presented with faithful realism.

The gripping story culminates in a sensational tribulation on the stock market and the historic gambles place has been reproduced in every detail. Young Michael takes the commanding role in all these events in a manner that leaves no question of his fitness, either to ascend to his uncle's mantle or to win the hand of the lovely Kathryn McGuire, who plays the feminine lead.

The evolution of the picture is full of surprises in its original treatment and can be counted on as a novelty for the legions whom Mr. Sennott numbers among his followers. Indeed, it is hardly less than twelve featured players—surely a record. They are George O'Hara, Kathryn McGuire, Noah Berry, Ethel Grey Terry, Charles Murray, Billy Devan, Mildred June, Eddie Gribbon, Dot Hurley, Ben Deely, Wyndham Standing and Robert Cain.

THE PARAMOUNT.

"GOLD GRABBERS," the leading attraction today and tomorrow at this theatre, presents Franklin Farnum in the stellar role. The picture was made in the "Garden of the Gods," Colorado, one of nature's greatest beauty spots. The scenery has never been caught by a motion picture camera before. The story of "Gold Grabbers" is an in the Argosy All Story Magazine and was read by thousands—and these people are all waiting to see a picture the story they read in the magazine. "Gold Grabbers" has a moral. It is a picture that anyone in the family can see and yet it is a feature that the man who likes the "wildest" kind of a story will enjoy. It is full of action.

"Shorty" Hamilton, who is known to every fan, having appeared in hundreds of pictures, Al Hart, popular Broadway actor, and Foggy O'Day, who played the lead in "The Affairs of

the Jungles," appear in the cast supporting Mr. Farnum.

THE ORPHEUM.

"TRAVELIN' ON," showing today and tomorrow at this theatre, is a Paramount picture with William S. Hart in the stellar role. Billed Thrill upon thrill up to a smashing climax and then a finish of a most unusual nature, aptly describes, in the proverbial nutshell, "Travelin' On." It concerns chiefly the mind struggles of two distinct types of men both coveting a good woman who in, so fate wills it, the wife of another man, a preacher of the word of God. There is a deadly rivalry which precipitates the thriller. Both men are fearless and in the matter of gunplay alone they demonstrate an art which has long since ceased to exist. The story was written by William S. Hart, himself, Lambert Miller photographed and Joe Augusti cranked with that consummate skill which has earned him the A. S. C. E. Ethel Grey Terry, Mary Joe Irving and Bradley Shaw are among those present in the cast and the entire picture is one decidedly not to be overlooked by devotees of the silent art. The picture is a virile explication of Arizona as it was in its most picturesque days, when might was right, and a highly-strung trigger finger dictated the law. It introduces many characters which have long ceased to exist.

THE ORPHEUM.

"BLOOD AND SAND," which will be the feature at this theatre Monday, Tuesday and Wednesday of next week, presents Rodolph Valentino in his first starring Paramount vehicle. Sensational to the limit in this great drama story of the life and loves of a young bull-fighter, are those scenes in which Mr. Valentino does sword and capoe play before picked animals of Senor Murra, the Duke of Veragua and the Marquis of Sallido, the three leading bull-breeders in Spain. He was trained for the dangerous business by Rafael Palomar, famous Spanish matador, and was well-versed in the graceful art.

"Blood and Sand," a Fred Niblo production, is a story of a bull-fighter. It abounds in those colorful elements every American admires. It was adapted by June Mathis while Alvin Wyckoff presided at the camera. Lila Lee and Nina Naldi have the principal feminine roles while others in the cast include Walter Long, Lee White, Rose Romanova, Marie Marant, George Periolat, Jack Winn, Harry Lamer, Fred Becker, Charles Belcher and Gilbert Clayton.

Does real partnership bring married happiness?

Mrs. W., prominent in Washington, was recently asked: "What is the secret of your happy marriage?" She gave this modest answer: "Our married life is a co-partnership. We work together."

Her husband, a member of President Harding's Cabinet, went further. He explained that Mrs. W.'s household economies had helped him through several business crises.

Does *your* husband really know how constantly you are helping him by your economies? Don't be too modest to tell your husband about your saving. After all, men are human.

If you wish to enjoy another possible saving, ask your grocer about Brednut—the approved new spread for bread.

Pasteurized milk! Tropical nuts! A delicious new home economy!

Made only from pasteurized milk and tropical nuts, Brednut has a delicious, fresh flavor. Your husband and children will notice no "difference."

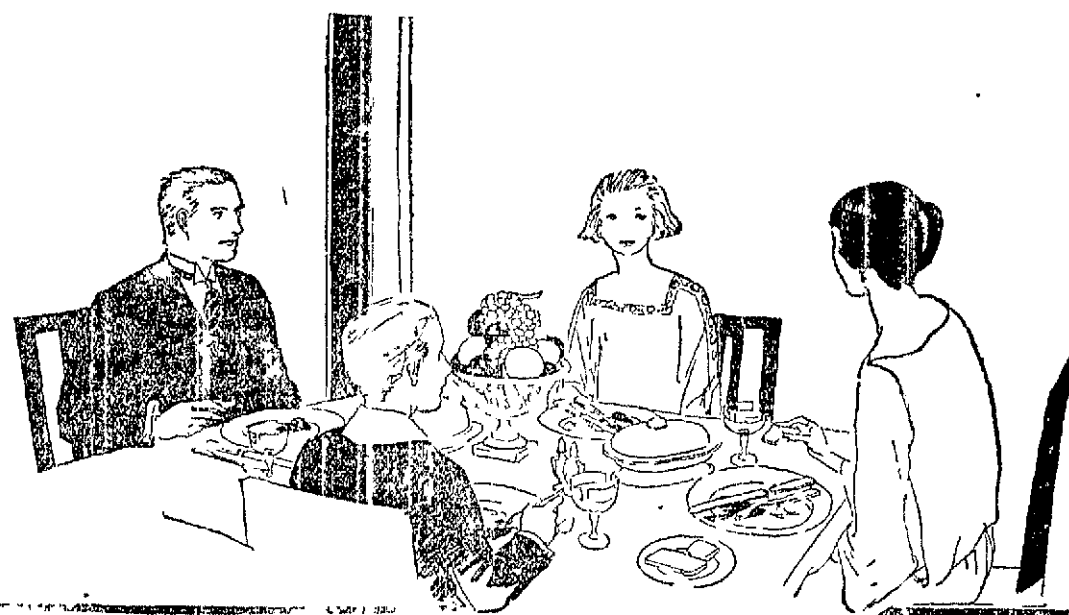

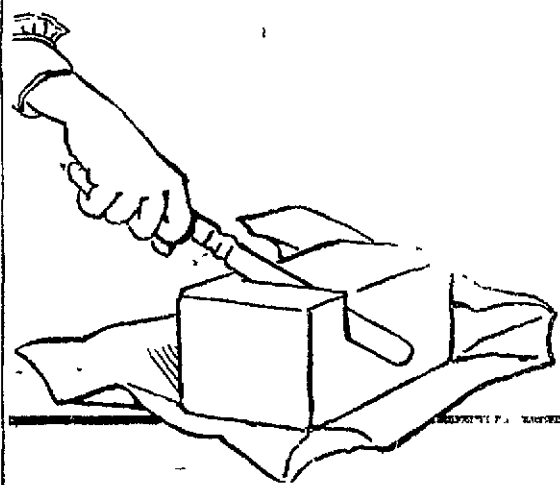

When you see them enjoying healthful Brednut as a spread for bread, rolls and biscuits, remember

that such foods are digestible and nourishing. Bulletins of the U. S. Department of Agriculture so state.

Yes, Brednut comes to you uncolored—a pure white. With wholesome vegetable material (gratis from your grocer) you can quickly color Brednut to a rich golden yellow.

The Taste of Spring! A Brednut and Watercress Sandwich

Spread two slices of bread with Brednut and cream cheese. Put watercress between the slices. See if Brednut isn't as delicious—as fresh-flavored a spread for bread as you have ever tasted.

BREDNUT the new delicious Nut Margarine
A delightful aid to home economy

Republican Administration Promotes World Peace Plans

Maintains Vigorous American Policy, Avoids Foreign Entanglements and Achieves Great Practical Results for World Peace.

U. S. REPRESENTATIVE HORACE M. TOWNER (IOWA), CHAIRMAN HOUSE COMMITTEE ON INSULAR AFFAIRS

The people of the United States earnestly desire peace. The last administration, with an insistence that would not consider any method of securing the peaceful settlement of international disputes except the League of Nations, went out of power largely because of that fact. The people saw in that scheme an assurance of further wars rather than a reasonable plan for the discouragement and prevention of wars.

The present administration with rare wisdom undertook to secure concrete and definite international agreements which would result in diminishing the probability of future wars by limiting the armament of those nations whose competitive strife could only result in future wars. Accordingly, the President called a Conference to meet at Washington to consider the limitation of armament and to make such settlements and agreements especially with regard to the Pacific and adjoining territory as would determine existing disputes and remove causes of future discord.

Through these agreements, which are being actually carried into effect by the contracting nations, we have greatly reduced the war burden of

the nations parties to the Conference, we have made war more difficult and less justifiable for all nations, and have given a new assurance to those who desire and hope for the future peace of the world.

The present administration has given not only actual and practical expression of its desire for peace, it has gone to the extreme limit in the reduction of its military establishment.

We are "scrapping" our Navy down to the treaty standard, by which the United States must limit its tonnage to \$55,000, Great Britain \$125,000; Japan 315,000; France 175,000; and Italy, 175,000.

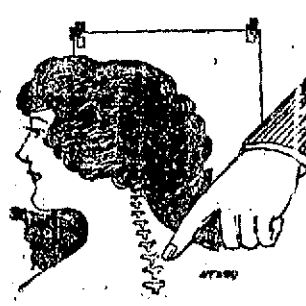

We have reduced our annual war expenditures of over \$10,000,000,000 to about \$600,000,000 and are making further reductions every year.

The last administration refused to end the war with Germany for over two years after the Armistice was signed, except upon acceptance of the Versailles treaty with the League of Nations. The present administration made peace with Germany without delay and without surrender of any right the United States had acquired by its participation in the war.

The United States will not be an isolated nation under Republican administration. But it will be the continued policy of the Republican party to keep the United States to its traditional policy so as to prevent entanglement in the mazes of conflicting interests, territorial quarrels, religious hatreds, and race jealousies which have afflicted Europe for more than a thousand years. The peace-loving people of America will do well to maintain that policy, and to support that party which not only desires peace but takes practical measures to obtain it; which is not afraid to propose and effect reductions of our own Army, Navy and armament in order to induce other nations to do likewise; and which will not be swayed from its policy and purpose by any chimerical scheme, or by any ambitious or sordid lust for power.

Through these agreements, which are being actually carried into effect by the contracting nations, we have greatly reduced the war burden of

Salt Cause of Cancer, Potassium Nitrate Cure, New York Doctor's Claim

Cancer is produced by too much salt (calcium chloride) in the blood, according to the theory of Dr. Edward Percy Robinson of New York, who says that it can be cured by administering potassium nitrate. Dr. Robinson has published several articles on this subject. In the Medical Record (New York), he cites eight cases of unquestioned cancer treated by this method, all of which are decidedly improved and several of which seem to be cured.

In support of his theory Dr. Robinson cites the fact that cancer is rarely found among the inhabitants of Japan, China, Korea, the Philippines, India, Spain and Egypt, who are almost exclusively vegetarians. In these countries potassium nitrate is found, and it is surmised that it finds its way into the human system with the vegetables, of which it is a constituent.

"Furthermore," he continues, "it appears that animals living in a wild state are also free from cancer, but develop it as soon as they are brought into captivity, domesticated and fed the diet of modern civilization. For example, it is not uncommon to find horse dogs and cats afflicted with cancer. The writer was fortunate to discover, accidentally, a cat with cancer of the lip which served to verify the presumption that there is in or about civilization something which predisposes to the development of cancer—and this something is common table salt. This cat is four years old and came into possession of the family when it was a kitten.

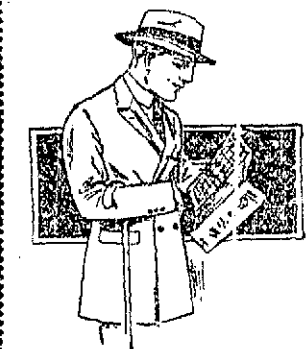

"Believing in the popular idea that salt is good for animals, the cat's food was generously sprinkled with salt, for which the cat developed a taste. After three and a half years of this diet the cat became sick and its fur began to fall. It refused to eat and the upper lip became sore and red.

Local remedies were applied, but after six months of treatment, in which many things had been tried, the cat was taken to a veterinarian, who pronounced the condition cancer and advised that the animal be killed. With a history of an excess of salt in the diet, the cat presented an excellent opportunity to try the efficacy of potassium nitrate. Therefore the same treatment was administered as was given to patients with cancer, with the result that the cat is cured and has grown a new coat of fur.

"That salt stands convicted of the cause of cancer seems to be based upon more than circumstantial evidence, for in all cases of cancer giving a history of an excess of salt in the diet its elimination by potassium nitrate has been productive of cure or in greatly ameliorating the condition and relieving pain.

"The writer has so far treated cancer of the bone, glands, liver, stomach, mucous membrane and skin. In not one case has the condition failed to respond to the influence of potassium nitrate. Some have been cured, others are under treatment and improving, the prognosis pointing to a favorable recovery.

"It may well be asked, how long will a patient remain cured of cancer? This may be answered by another question, how long will a person cured of alcoholism remain sober? We read a great deal about educating the public regarding cancer, but it is more difficult to do so intelligently when all that is now advised is a surgical operation. Hygiene and diet, the very moderate use of salt and plentiful amounts of fresh vegetable substances, containing the mineral salts of which protoplasm is composed, seem to the writer to be the synopsis of public education."

STORIES OF GREAT INDIANS

By Elmo Scott Watson

Copyright, 1922, Western Newspaper Union.
STANDING BEAR WINS LIBERTY
BY HARBES CORPUS WRIT

ONCE upon a time a writ of habeas corpus was invoked in behalf of an Indian and the decision in his case marked a new epoch in the conduct of our Indian affairs. That man was Standing Bear (Moo-chu-nah-zin), chief of the Poncas.

In 1877 the government decided to remove Standing Bear's people from their ancestral homes in Nebraska to Indian Territory. In spite of his opposition, and plus other chiefs were taken south to choose a reservation. They would not select a place, whereupon the agent refused them transportation home.

At night they slept in haystacks, shivering with the cold. Their only food was raw corn which they found in the fields. Their moccasins wore out. After 40 days they reached the Otoe reservation in Nebraska and as they walked into the agent's office they left bloody footprints on the floor. Ten days later they rode wearily into their home camp on ponies which the Otoes had given them.

In their absence an official of the Indian department arrived to remove the Poncas by force. Accepting the inevitable, Standing Bear prepared to renounce his steps. After a terrible journey, during which two of Standing Bear's children died, the discouraged Poncas settled in their new homes. Within a year a third of the tribe perished. Then Standing Bear's favorite son died. In January, 1879, he took the bones of his sons, and started once more to Nebraska.

Two months later they arrived destitute at the Omaha reservation. They borrowed land and seed from the Omahas and were preparing to put in a crop when soldiers appeared to arrest and return them to Indian Territory. Then public sentiment intervened. Two white lawyers offered to defend the Poncas and sued out a writ of habeas corpus.

Although attorneys for the Indian department contended that Indians were "not persons within the meaning of the law," Judge Dundy ruled against them and ordered the prisoners released. "Once I avenged my wrongs with the tomahawk," said Standing Bear, "but the white man's way is better. I lay the tomahawk down forever."

By this time Standing Bear's case had attracted national attention and a senate investigation of the Ponca removal resulted in restoring them to their old homes. Here September 9, 1908, Standing Bear died at the age of eighty years.

The Sporting World

Best Game of the Season Is Scheduled for Saturday Afternoon, Fayette Field

Tornadoes and Hill Top Y. M. C. A. Considered Evenly
Balanced.

H. S. GOES TO GREENSBURG

When the Connellsville Tornadoes step on the field against the Hill Top Y. M. C. A. team tomorrow afternoon football fans of the region will see two of the most evenly balanced teams in Western Pennsylvania wage battle for honors.

The Tornadoes will be in action for the first time in two weeks and hundreds of supporters will be on the grounds to see the whirlwind aggregation take on additional speed with its own coach on the field on play directing its work.

The Hill Tops are said to be very confident of victory this season and it is reported in betting circles that the team will bring its financial backers along. Last year the team held the Tornadoes to two touchdowns in a spectacular contest. Undoubtedly both teams are stronger this season and what the outcome will be is a matter of conjecture. No one can tell a Connellsville fan that the Tornadoes are not superior however.

The biggest crowd of the season is anticipated for several reasons. One is that the independent team has been idle for two weeks. Another is that the Tornadoes will have to suspend if the receipts are not substantial. A third is the first appearance of Casey Jones and Melroy Smith in the lineup, and last of all because Connellsvilleans remember of the Hill Toppies and their fighting eleven.

Connellsville High held a light signal practice this afternoon in preparation for the Greensburg game at that place tomorrow afternoon. The Tornadoes will go to the Westmoreland country at 4 p.m. Rooters will leave about 1 o'clock on a street car.

Following the game tomorrow the Tornadoes will be able to relax a little. Melroy Smith plays here the following Saturday and the team according to reports is not overly strong. It will be no mean opponent however. The Tornadoes will see a bit west being 2-6, Norman.

East Huntingdon High and Youngwood are scheduled to play this afternoon.

Dunbar Township High will play Jeannette High at Jeannette tomorrow at 2 p.m. The team and rooters will leave Connellsville on the 11 o'clock West Penn car.

South Union High will be the attraction at Parkersburg Saturday afternoon meeting Perry Township High on Oct. 21.

Confluence

CONFLUENCE Oct. 21—G. L. Cunningham who has been in poor health for some time, is improving slowly. The women of the Methodist Episcopal Church held a farewell reception for Mrs. Cogley, wife of Rev. J. M. Cogley, Tuesday evening Nov. 1. Mrs. Cogley will go to Scotland where the former has been assigned as pastor.

John Sand's went to Maple Summit yesterday to visit his mother who is ill. A. Vansiel of T. M. left last night for Baltimore Md. to take medical treatment. Frank Kutz has returned to his home in Braddock Pa. after a visit to Addison. Mrs. Thoma Crow has gone to Lebanon to visit friends. M. R. Oster who has been in Baltimore Md. for several days taking medical treatment arrived home yesterday. Mrs. John Dyer has returned from a visit with friends at Connellsville. "Shore it's a clutch Beldin is again to lose some of them animals of his," said "You can search me if I don't think there'll be more done on the border here than along the Rio Grande."

"Look-a-here, Laddy; you can't be here all you hear," replied Jim, seriously. "If you reckon you might have any trouble."

"Back up, Jim. Shore you're standing on your bridge. There's more done than the middle of a few horses. An' Fortiori River is going to get hers!"

Another dawn found Gale so much recovered that he arose and looked at himself; not, however, without considerable difficulty and rather disconcerting twinges of pain.

Some time during the morning he heard the girls in the patio and called to ask if he might join them. He received one response, a mellow, "Si, señor." It was not as much as he wanted, but considering that it was enough, he went out. In the shade of a beautiful tree, he found the girls, Mercedes sitting in a hammock, Nell upon a blanket.

"What a beautiful tree!" he exclaimed. "I never saw one like that. What is it?"

"Palo verde," replied Nell.

"Sonor, palo verde means 'green tree,'" added Mercedes.

Gale speaks of . . . I remember the college at Lawrence, though I was only twelve. I saw races—and once real football. . . Mr. Gale, of course, you've seen games?"

"Yes, a few," replied Dick; and he laughed a little. It was on his lips then to tell her about some of the famous games in which he had participated. But he refrained from exploiting himself. There was little, however, of the color and sound and cheer, of the violent action and rush and battle incidental to a big college football game that he did not succeed in making Mercedes and Nell feel just as if they had been there. They hung breathless and wide-eyed upon his words.

Some one else was present at the latter part of Dick's narrative. The moment he became aware of Mrs. Beldin's presence he remembered frowning he had heard her call, and now he was certain she had done so. Mercedes and Nell, however, had been, and still were oblivious to everything except Dick's recital. He saw Mrs. Beldin cast a strange, intent glance upon Nell, then turn and go silently through the patio.

Dick was haunted by the strange expression he had caught on Mrs. Beldin's face, especially the look in her eyes. It had been one of repressed pain liberated in a flash of certainty. The mother had seen how far he had gone on the road of love. Perhaps she had seen more—even more than he dared hope.

CHAPTER VI

The Yagui.

Toward evening of a lowering December day, some fifty miles west of Fortiori River, a horseman rode along an old, dimly defined trail.

This lonely horseman bestrode a steed of magnificent build, perfectly white except for a dark bar of color running down the noble head from ears to nose. Sweat-soaked dust stained the long flanks. The horse had been running. He was lean, gaunt, worn, a huge machine of muscle and bone, beautiful only in head and mane, a well-carried, a horse strong and fierce like the desert that had

been born. The rider fitted the horse as he fitted the saddle. He was a young man of exceedingly powerful physique, wide-shouldered, long-armed, big-legged. His lean face, where it was not red, blistered and peeling, was the hue of bronze. He had a dark eye, a falcon gaze, cool and keen. His jaw was prominent and set, master-like; his lips were stern. He was youth with its softness not yet quite burned and hardened away that kept the whole cast of his face from being ruthless.

This young man was Dick Gale, but not the listless traveler, nor the loquacious wanderer who, two months before, had by chance dropped into Chasita. The desert had claimed Gale, and had drawn him into its crucible. The desert had multiplied weeks into years. Heat, thirst, hunger, loneliness, toil, fear, ferocity, pain, he knew them all. He had felt them all, the white sun, with its gleam, reaching, lurid fire; the cruel spit of wind and rasping, dry-puffed tongue; the sickening ache in the pit of his stomach; the insupportable silence, the empty space, the utter desolation, the contempt of life; the water and wait, the dread of ambush, the swift flight; the fierce pursuit of men wild as Bedouins and as fleet, the willingness to die sudden death, the pain of poison thorn, the stinging fear of lead through flesh; and that strange paradox of the burning desert, the cold at night, the piercing icy wind, the dew that penetrated to the marrow, the numbing desert cold of the dawn.

Ladd's prophecy of trouble on the border had been mild compared to what had become the actuality. With rebel occupancy of thearrison at Chasita, outlaws, bandits, raiders in rioting bands had spread westward. Many a dark-skinned rider bestrode one of Beldin's fast horses; and, indeed, all except him, selected white thoroughbreds had been stolen. So the job of the rangers had become more than a patrolling of the boundary line to keep Japanese and Chinese from being smuggled into the United States.

On this December afternoon the three rangers, as often, were separated. Lash was far to the westward of Sonoyta, somewhere, along Camino del Diablo, that terrible Devil's road, where many desert wayfarers had perished. Ladd had long been overdue in a prearranged meeting with Gale. The fact that Ladd had not shown up miles west of the Papage well was significant.

TO BE CONTINUED.

Part of It.

Blinks (in girl and music show)—Nice song, eh? Do you know the chorus?

Jinks—Not so loud, my wife is with me. I know that little blonde on the end.

Service.

"Not many old-fashioned housekeepers left," declared the grocer.

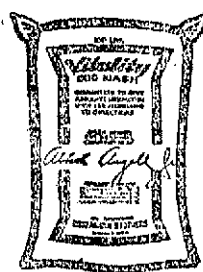

"No." "No. Some of our customers expect us to supply dyed eggs for them."

Announcement to Poultry Raisers

VITALITY Egg Mash is now made under Mr. Angell's Original Formula, improved with buttermilk. It is the result of years of practical poultry experience with every known formula and ingredient. It will positively produce more eggs at less cost than any food known—whether manufactured or made at home.

Feed it alongside of any other mash you may select and the results will amaze you. It is the cheapest in price because it produces more eggs.

It must be the main feed of the day and kept constantly before the fowls in the Vitality Self-Feeder—nothing mixed with it, and nothing fed besides Four-O-Clock Scratch Grains as an evening meal at four o'clock. To accomplish the most in production, a hen must consume a greater amount of mash than grain; in fact, twice as much mash. Therefore, see to it that the mash hoppers are always full and that nothing else is used that will "stall" the hens.

Be sure the signature of Albert Angell, Jr., is on every sack of Vitality Feed, with our guarantee of absolute satisfaction when fed according to directions.

PAITAL RECOVERY IN PRODUCTION OF BY-PRODUCT COKE

The Total in September Was
2,214,000, Increase of
450,000 Tons.

STILL SHORT LAST JUNE

Output of 55 Per Cent in Combined Out-
put of By-Product and Beehive Over
Average in 1921, But a Decrease of
44 Per Cent Compared With 1920.

Free movement of coal permitted a
partial recovery in the output of by-
product coke during the month of Sep-
tember, says the monthly report of the
United States Geological Survey. The
total production was 2,244,000 net
tons, an increase over August of 450,-
000 tons. In spite of the increase the
output was 336,000 tons short of last
year when the maximum for the pres-
ent year was reached. The ovens oper-
ated during September at 67.2 per cent
of capacity. Of the 71 plants, 57 were
reported active and 14 idle. Production
of beehive coke also increased
slightly; from 629,000 to 605,000 tons.
Because of the strike in the Connells-
ville district, however, the present out-
put of beehive is barely one-third of
the 1920 average.

The total production of all coke was
thus 2,859,000 tons, an increase of 35
per cent over the average for 1921, but
a decrease of 34 per cent when com-
pared with 1920.

The monthly average of by-product
and beehive coke output during the
past five years and the past four
months of the present year has been
as follows:

	By-Product	Beehive
1917	1,870,000	2,784,000
1918	2,146,000	2,840,000
1919	2,095,000	1,618,000
1920	2,286,000	1,743,000
1921	1,646,000	473,000
June, 1922	2,580,000	438,000
July, 1922	2,458,000	401,000
August, 1922	1,794,000	629,000
September, 1922	2,244,000	605,000

The quantity of coal consumed in
the manufacture of coke during Sep-
tember was approximately 4,179,000
tons, of which 3,223,000 tons were
used in by-product ovens and 956,000
in beehive ovens. These figures throw
light upon the present requirements
for coal. They indicate that the pres-
ent consumption for coke manufacture
is halfway between the extreme de-
pression of 1921 and the year 1919. In
comparison with the active year 1920,
present consumption shows a sharp
decrease.

Assuming a yield in merchantable
coke of 69.6 per cent of the coal
charged in by-product and 63.4 per
cent in beehive ovens, the average
coal consumed in the manufacture of
coke during 1917-1921 inclusive and
the past four months of 1922 has been
as follows:

	By-Product	Beehive
1917	2,525,000	4,364,000
1918	2,972,000	4,014,000
1919	2,355,000	2,478,000
1920	2,841,000	2,466,000
1921	2,401,000	721,000
June, 1922	1,707,000	721,000
July, 1922	1,571,000	710,000
August, 1922	1,577,000	850,000
September, 1922	2,523,000	850,000

SULPHUR CLEARS A PIMPLY SKIN

Apply Sulphur as Told When Your
Skin Breaks Out.

Any breaking out of the skin on
face, neck, arms or body is overcome
promptly by applying Menthos-Sulphur.
The pimples seem to dry right up and
go away, declares a noted skin spe-
cialist.

Nothing has ever been found to take
the place of sulphur as a pimple re-
mover. It is harmless and inexpen-
sive. Just ask any druggist for a
small jar of Rowles Menthos-Sulphur
and use it like cold cream. Adver-
tisement.

COKE PRODUCTION

In Connellsville and Lower Connells-
ville Districts, Compared With 1921.

The estimated production of coke in
the Connellsville and Lower
Connellsville districts, by weeks,
with the total compared with the cor-
responding week of 1921 is shown in
the following.

Week	Merch	Furn	Total	1921
Jan. 7	34,020	47,120	81,140	202,947
Jan. 14	35,110	51,100	86,210	170,160
Jan. 21	30,710	55,830	86,540	170,660
Jan. 28	35,680	56,790	92,470	166,630
Feb. 4	31,290	57,200	88,490	167,950
